Summary of Qualifications

- 13 years of web development experience.
- Demonstrated strong leadership as a Team Lead for the past 4 years, overseeing successful project deliveries, implementing process improvements, and fostering a collaborative team environment.
- Proficient in JavaScript/Typescript, React, Next.js, React Native, Node.js, SQL, and PHP.
- Integrate various platforms into CI/CD processes with AWS, Heroku, and Digital Ocean.
- Leverage git-based solutions: GitHub, GitLab, and Bitbucket.
- Lead the teams to implement automated testing within the development process.
- Collaborate with customers, management, and other teams to ensure everyone's needs are met on time and on budget.
- Develop strong relationships with team members to get the very best out of each one of them.

Work Experience

Team Lead / Senior Web Developer   **January 2019 – Current**
Clear Com Media, Windsor Ontario

- Develop applications using React w/ Next.js and backend REST APIs built on Node (Nest framework).
- Successfully developed a React Native mobile application using Expo, demonstrating proficiency in cross-platform development.
- Lead the revision of the internal billing system, automated daily reporting, while also reducing CI/CD process time from 50 to 7 minutes.
- Implemented process improvements: git-branching strategy, CI/CD, and mentored junior developers.
- Provided leadership for custom projects, public-facing IPs, and internal projects. Spearheaded the development of intricate WordPress projects, crafting custom plugins and themes to fulfill diverse client needs. Noteworthy achievements encompassed automation, involved theme enhancements, implementation of licensing systems, creation of complex layouts, and establishment of an optimized minified build system.

Web Developer   **June 2009 – January 2019**
Digital Media, Windsor Ontario

- Led development of successful websites with custom designs, utilizing React JS and PHP.
- Oversaw the launch of every website that the company developed.
- Developed a custom e-commerce experience still in use today.
- Focused on workflow efficiency and problem-solving throughout project development.
- Managed and instructed junior/contractor developers.
